Abstract

Deliverable 5.3 '*Short video*' is of type '*Coordination of the project*', meaning that the deliverable is video itself, rather than this brief accompanying report. This report provides an overview of the video and an access to the file as it would be too large to upload to the Grant Management system.

1. Short video

The video discusses the outcomes that have been reached during the SUPERTED project. All the project participants come together to highlight their role in the development of the SUPERTED detector as the project coordinator, professor Tero Heikkilä takes the viewer through the challenges and advancements of the project.

The video has been published on the University of Jyväskylä YouTube channel (<https://www.youtube.com/watch?v=JmAcmPStZ6Y>) and on the SUPERTED webpage (<https://superted-project.eu/news>). Additional visibility will be provided by sharing the video in suitable social media channels such as the SUPERTED Twitter account. Shorter, easily sharable version will also be used for this purpose.

The video was produced by Melko Media (<https://melkocomedia.fi/>).
